Office Action Summary	Application No. 10/658,932	Applicant(s) KU, DAVID N.	
	Examiner Dave Willse	Art Unit 3738	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Art Unit: 3738

Claims 8, 10-12, 27, 53-55, and 70 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on February 9, 2006.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-7, 9, 13-26, 28, 29, 34-52, 56-69, and 71-73 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention. The particular range associated with “a compressive modulus of elasticity less than about 100 megaPascals” (e.g., claim 1, lines 2-3) is not found in the original disclosure, nor is such a range suggested by any disclosed example having a compressive modulus of elasticity of about 100 megaPascals (MPEP § 2163.05). Likewise, the limitation “compressive modulus of elasticity that is between about 1 MegaPascal to about 20 MegaPascals” (e.g., claim 48, lines 4-5) is not supported by the original disclosure, especially for the crystalline PVA hydrogel as claimed. In claim 3, line 2, the upper limit *neighborhood* of “*about 5 MPa*” (emphasis added) is not believed to have support. In claim 8, line 2, “a compressive modulus of elasticity that is not constant” is not mentioned in the original disclosure. Regarding claim 11, the lower limit *neighborhood* of “*about 1 Newton*” (emphasis

added) is lacking in the original disclosure. In claim 40, line 3, the negative limitation "plateless" is absent in the original disclosure. *Similar problems exist in other claims.*

The Applicant has not *specifically* pointed out the support for *every* added claim limitation (MPEP § 714.02). Prior art may be applicable once the above problems have been corrected.
